

## ▶ CARTRIDGE FILLING STATION

### WHAT DO YOU GET?

#### Cost Savings

- ▶ 40-60% reduction in material cost
- ▶ Bulk material dispenser, without losing the advantages of a cartridge gun

#### Accuracy

- ▶ Pin shut-off allows for exact material amounts
- ▶ Displacement pumps with consistent flow

#### Versatility

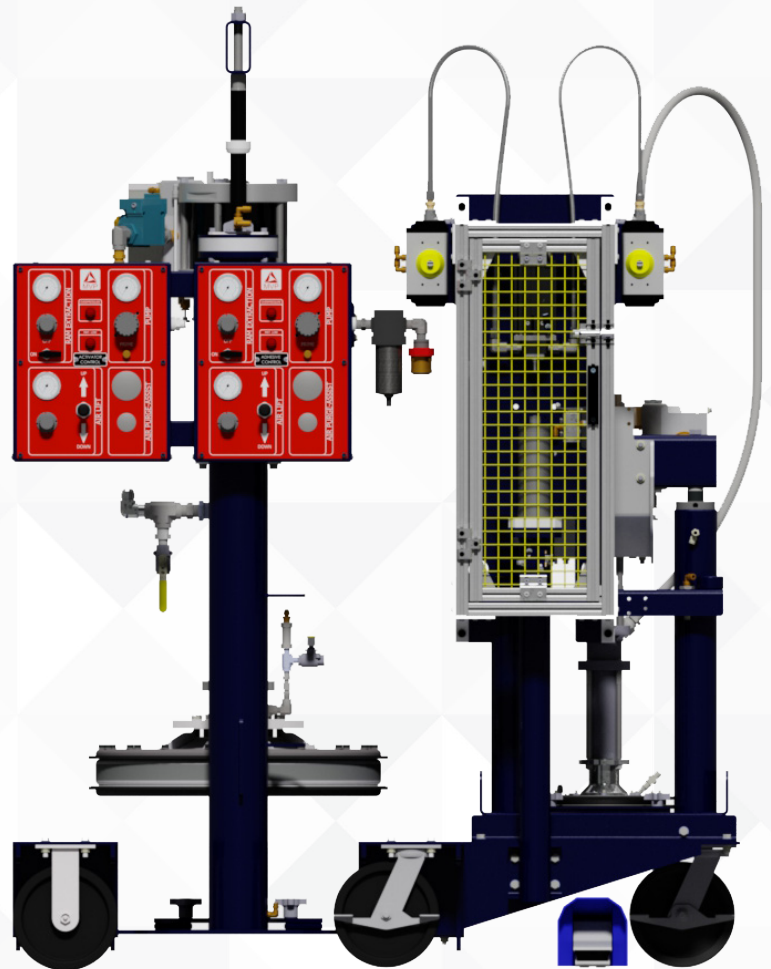

- ▶ 490mL to 1500mL cartridges
- ▶ Ability to fill cartridges from 1:1 to 10:1 ratios

#### Dependability

- ▶ Rugged pump design
- ▶ Expert service assistance available globally through the equipment manufacturer & authorized distribution network

#### Ease of Use

- ▶ Foot pedal for automatic dispensing
- ▶ Control panels for pump operation

- ▶ For more information about adding the cartridge filling station to your operation, or any of your adhesive dispensing needs, visit Magnum Venus Products at **[www.mvpind.com](http://www.mvpind.com)**.

**Accurate.  
Dependable.  
EASY TO USE.**

Cartridge dispensers are an effective tool for applying bonding or sealing agents in hard to reach areas. Whether the material is being applied to a corner of a trailer or the ceiling of a bus, cartridges help manufacturers where bulk dispensing is inconvenient or difficult. Cartridge dispensers also protect the bottom line for our customers as prefilled cartridge costs continue to rise. Magnum Venus Products proudly introduces a better, more cost-effective solution; the **MVP Cartridge Filling Station**

- ▶ **MVP is customer focused and product driven. This commitment to the companies we serve has given birth to the Cartridge Filling Station. The use of cartridges for applying materials is critical for manufacturers in a variety of industries. Taking this application process and adding the benefit of bulk material pricing improves your bottom line.**

The cartridge filling station dispenses most non-spacer bead adhesives with a viscosity between 40,000 and 1,400,000 cps. Up to three 10:1 cartridges can be filled per minute. This gives you the freedom to continue using your current adhesive or sealant without the constraints of material packaging.

**Designed with  
YOU IN MIND.**
